Response to Arguments

Applicant's arguments filed 07/24/2009 have been fully considered but they are not persuasive.

Applicants assert that none of the cited references relates to a thixotropic gel having the five specific attributes called for in claim 1 and detailed in pages 10-11 of their arguments, thus applicants surmise that none of the references teaches a composition similar to applicants claimed invention.

The examiner respectfully disagrees with the above assertion. The intended use type of limitations within steps (i)-(iii) of claim 1 are considered met by the prior art because the compositions are within applicants claimed scope thus they will inherently be able to perform the same intended use even if this feature is not disclosed within the references. Applicants have not amended their claims in such a way as to preclude the prior art references since applicants composition does not limit the ingredients or the amounts of those ingredients so that the prior art does not anticipate their claims. The subject matter of a properly construed claim is defined by the terms that limit its scope. It is this subject matter that must be examined. As a general matter, the grammar and intended meaning of terms used in a claim will dictate whether the language limits the claim scope. Language that suggests or makes optional but does not require steps to be performed or does not limit a claim to a particular structure does not limit the scope of a claim or claim limitation. The following are examples of language that may raise a question as to the limiting effect of the language in a claim:

- (A) statements of intended use or field of use,
- (B) "adapted to" or "adapted for" clauses,
- (C) "wherein" clauses, or

(D) "whereby" clauses

As recited previously since the references above all teach a composition within applicants claimed scope it is inherent that the same composition will have the same properties. It appears as though applicants may be attempting to claim a new property of an old composition. Where the claimed and prior art products are identical or substantially identical in structure or composition, or are produced by identical or substantially identical processes, a prima facie case of either anticipation or obviousness has been established. Thus the claiming of a new use, new function or unknown property which is inherently present in the prior art does not necessarily make the claim patentable. In re Best, 562 F.2d 1252, 1254, 195 USPQ 430, 433 (CCPA 1977).

Conclusion

No claims are allowed at this time.

Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
